

# MOMENTARY STEEL BUTTON

with high protection classes

Our tactile steel button impresses with its high-quality materials, protection class and ergonomics. It is made of stainless steel. Thanks to its design, wide temperature range and durability, our steel button is suitable for many applications.

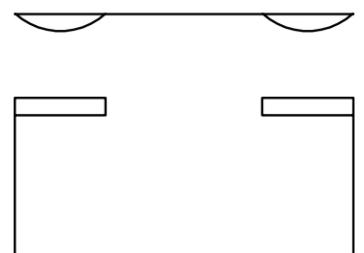

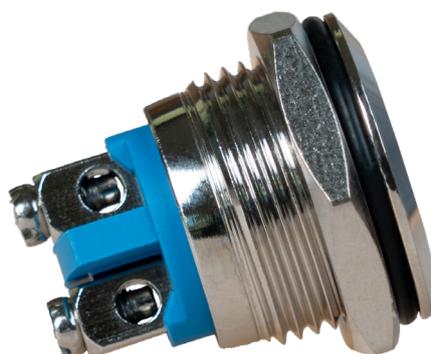

The design of the surface means there are no sharp edges. The connection using a screw terminal enables quick and easy installation in your project.

## MAIN FEATURES

Core & outer material	Stainless steel
Material of the pins	Aluminum oxide, copper-coated
Key depth	2.5 mm
Operating mode	Keyboard
Special features	Connection via screw terminal
Scope of delivery	Button, sealing ring, nut

## FURTHER SPECIFICATIONS

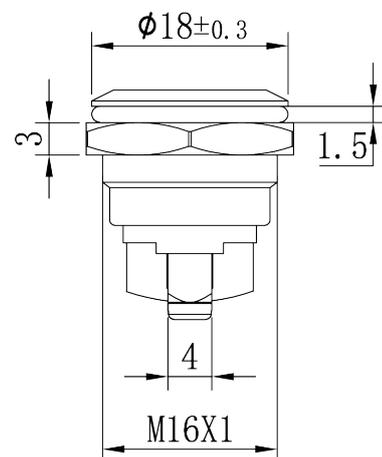

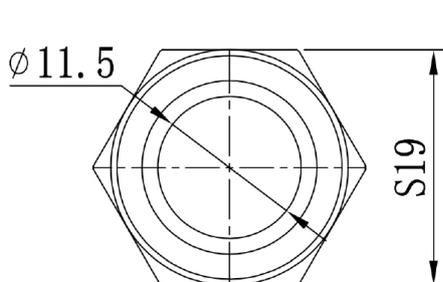

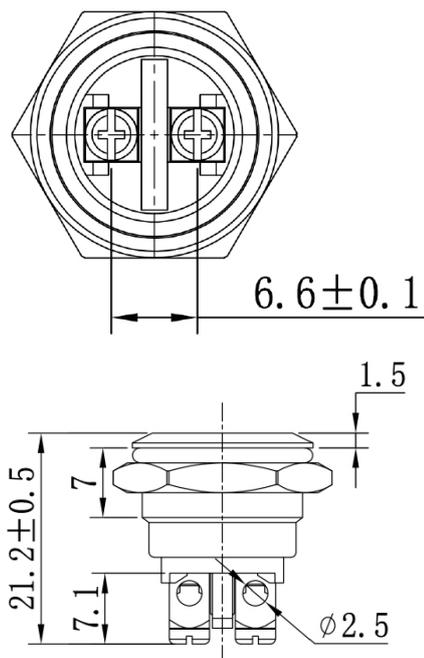

Nominal load	Resistive: 2 A / 36 V DC
Minimal load	5 mA / 3 V DC
Service life	<b>Electronical (resistive):</b> 2 A / 36 V DC: 20.000x <b>Mechanical:</b> ≥ 500.000x
Connections	NO, NC
Insulation resistance	≥ 1000 MΩ
Breakdown voltage	2500 V AC
Contact resistance	≤ 50 mΩ
Torque nut	0.8 - 1.2 Nm
Base material	PA66 flame retardant
Operating temperature / humidity	-20 to 55°C with max 90% rH

NO

NO

## Button16C-01

### SPECIFIC INFORMATION

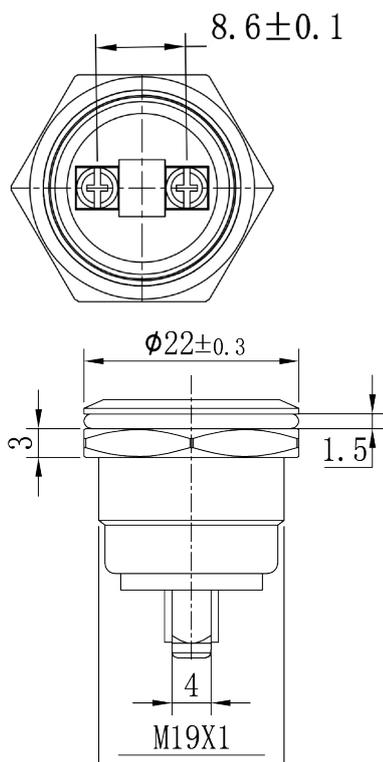

Dimensions  
Mounting hole  $\phi 16 \times \leq 2.5$  mm

Overall dimensions  $\phi 18 \times 21.2$  mm

Thread M16

Degree of protection IP60, IK09

## Button19C-01

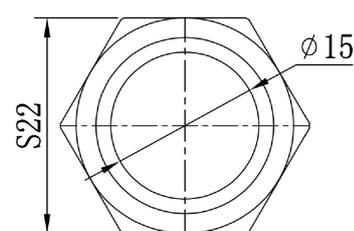

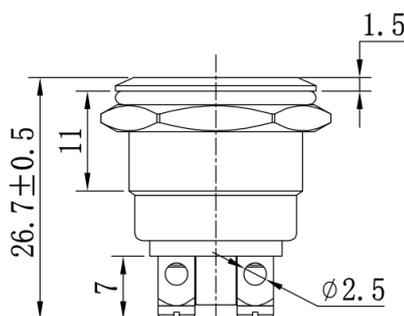

### SPECIFIC INFORMATION

Dimensions  
Mounting hole  $\phi 19 \times \leq 6.5$  mm

Overall dimensions  $\phi 22 \times 26.7$  mm

Thread M19

Degree of protection IP65, IK10
